PICKSEED®
good things growing...

Technical Data

Langara Kentucky bluegrass is a drought tolerant, early spring greening variety with exceptional summer density. It shows high resistance to all major turfgrass diseases, especially Brown Patch, Rust and Necrotic Ring Spot.

LANGARA
KENTUCKY BLUEGRASS

DESCRIPTION:
Langara is a finer-leafed, medium dark green variety with exceptional density and persistence at cutting heights down to ½ inch. Langara's aggressiveness, high density and low mowing tolerance make it an outstanding choice for golf course fairways, athletic fields, sod production nurseries and higher quality home lawns.

Langara greens up very quickly in the spring, as opposed to most new varieties. And with a unique background that differs significantly from the numerous "look-alike" reselections recently available, it makes great sense for the sod producer or other bluegrass grower who wants to be assured of genetically diverse turf.

MAINTENANCE:
The recommended seeding times for Langara are early to mid spring and late summer to early fall. A seeding rate of 3 – 4 lbs. per 1000 sq. ft. is recommended. Seeding rates as low as 1-1/2 – 2 lbs. per 1000 sq. ft. can be used where speed of establishment is not important. Under normal conditions, germination and establishment will occur 10 to 15 days after seeding.

USAGE:
Langara is an excellent variety for sports turf use; early spring green up combined with high drought tolerance and summer stress tolerance gives you the outstanding turf quality you're looking for. Combine these attributes with Langara's high resistance to all major turf diseases and you have an excellent ingredient for most any blend or mix.

TECHNICAL PRODUCT SPECIFICATIONS

Year of Introduction	2003
Main Uses	Lawns, sports turf, golf courses, sod, parks
Seed Count	1,350,000 seeds / lb.
Normal Days to Germinate	8 – 10 days (fall)
Normal Days to First Mowing	36 days (fall)
NTEP Quality Ratings (2001 - 2005 data)	Excellent – 6.0 Schedule B
Genetic Color	Medium - Dark
Summer Stress Tolerance	Outstanding
Leaf Texture	Very Fine – 6.6
Turf Density	Excellent – 7.9 (summer)
Shade Tolerance	Good – 5.3 (KY)
Sod Strength	Good – 43 lbs.
Wear Tolerance	Good
Close Mowing Tolerance	Excellent – tolerates ½"
Necrotic Ring Spot Resistance	Excellent – 6.9
Snow Mold Resistance	Very Good – 7.0
Brown Patch Resistance	Excellent – 8.8
Dollar Spot Resistance	Very good – 7.5
Rust Resistance	Excellent – 8.0
