

DLF is a global seed company dealing in turf seed, forage seed, and other crops. DLF is a market leader providing seed domestically and to more than 80 countries globally.

With a 25% market share worldwide, there is a good chance the animals that provide your milk, meat, and wool gathered the nutrition they need from DLF grasses. If you enjoy sports, you may well have seen your favorite team on a field turfed with DLF grass. And, if you like relaxing and playing in your yard, that too may well have begun life as a bag of DLF seeds.

# Premium Turf Varieties

## TALL FESCUE

**Establishment 10 to 14 Days**

*Use with or without bluegrass for sod, lawns, and sports fields from South to North*

**Bloodhound** - Aggressive tillering, Brown Patch resistance, shade tolerance, and density

**Cannavaro** - Extremely fine leaf texture, high density, and wear tolerance

**Essential** - High resistance to Brown Patch, improved density, leaf texture, and color

**Fat Cat** - Semi-dwarf growth habit with improved texture, color, and superb year-round performance

**Garrison** - Aggressive tillering, resistance to Stem Rust, Net Blotch, and Brown Patch, very drought tolerant

**Houndog 6** - High crown density, dark green color, medium leaf texture, and drought tolerance

**Houndog 8** - High crown density, fine texture, top turf quality, and disease resistance

**Jamboree** - Increased density, Brown Patch resistant, wear tolerant, fine leaves, fast establishment

**Rhizing Moon - A-LIST!** Highly rhizomatous, superior quality, drought tolerant, very dark green color

**Rhizing Star** - Rhizomatous with excellent wear tolerance, establishment, and recuperative ability

**Toccoa** - Dark green, excellent turf quality, superior Brown Spot resistance

**Turfway** - Dark green year-round, excellent drought tolerance, and Brown Patch resistance

**Unitus** - Brown Patch resistant, drought tolerant, exceptional turf quality, dark green color

## BERMUDAGRASS

**Establishment 14 to 21 Days**

*Use in lawns, sports fields, golf courses, and for sod in Transition Zone and Southern locations*

**Mirage 2** - Increased cold tolerance, Spring Dead Spot resistance, and green up

**Pyramid 2** - Fast establishment, high turf quality, superior wear tolerance and recovery, and high resistance to Spring Dead Spot

## PERENNIAL RYEGRASS

**Establishment 7 to 10 Days**

*Use alone or with bluegrass for year-round quality and sod strength*

**Aspire - A-LIST!** Broad spectrum disease resistance, especially Gray Leaf Spot and Helminthosporium

**Bandalore** - High turf quality and resistance to Brown Patch

**Diligent** - Very early spring green up, high Gray Leaf Spot resistance, fine leaf texture, and Red Thread resistance

**Esquire** - Early establishment, exceptional density, wear tolerance, year-round color, and performance

**Hancock** - Dark green color, tiller density, and fine leaf texture

**Keystone 2** - Better summer performance, disease resistance, density, and spring green up

**Regal 5** - Dark green color, Leaf Spot resistance, and summer performance

**Stamina** - Wear tolerant and excellent drought recovery

**Thrive** - Freedom from leaf diseases, superior overall quality, excellent drought tolerance

### ••• OLYMPIC VARIETIES •••

**All Star 3** - High turf quality, improved color, tiller density, leaf texture, Rust resistance, and salt tolerance

**Banfield** - Gray Leaf Spot and Brown Patch tolerance, improved turf quality, and color

**Derby Xtreme** - Increased density, wear tolerance, Rust and Gray Leaf Spot resistance

**Gator 3** - Heat and disease resistance, dark green color, and fine leaf texture

**Replicator 4N** - A tetraploid perennial ryegrass, heat tolerance, disease resistance, and low temperature germination

## BLUEGRASS

**Establishment 14 to 21 Days**

*Use alone or with ryegrass, tall or fine fescue for year-round quality and sod strength*

**Bandera** - Texas hybrid-type. Heat, wear and drought tolerance, and aggressive rhizomes

**Blue Ghost** - Secunda hybrid-type. Fast establishment, cool season growth, Stem Rust resistance, and drought tolerance

**Felder** - Shamrock-type. Rapid establishment, excellent traffic tolerance, early spring green up, and superior summer performance

**Fortuna** - BVMG-type. Medium green, fast establishment, wear and cold tolerant, disease resistant

**Geisha** - Aggressive-type. Very large seed, aggressive rhizomes, medium turf quality, texture, and density

**Geronimo** - BVMG-type. Rapid establishment, medium green, strong wear, heat, and drought tolerance

**Katie** - Shamrock-type. Low maintenance, rich green color, and resistance to Leaf Spot

**Mercury - A-LIST!** America-type. Aggressive, traffic and mow tolerance, early spring green up, and fine leaf texture

**Merit** - BVMG-type. Excellent turf quality, seedling vigor, wear, heat, and cold tolerance

**Midnight** - Midnight-type. Dark green color, Summer Patch resistance, heat tolerance, fine turf quality

**Rhythm** - Midnight-type. Compact vigorous growth, summer performance, and low mow tolerance

**Sombrero** - Aggressive-type. High density, traffic and drought tolerance combined with Snow Mold resistance

## BENTGRASS

**Establishment 14 to 21 Days**

*Use on golf course greens, tees, and fairways*

**Cobra 2** - Creeping. Improved density, summer performance, heat tolerance, winter color, and high Dollar Spot resistance

**Puritan** - Colonial. Excellent density, fine leaf texture, shade tolerance, and low mow tolerance

**Villa** - Velvet. High density and fine leaf texture, shade tolerance, and low maintenance

## FINE FESCUE

**Establishment 18 to 21 Days**

*Excellent as a component for shade and low maintenance areas*

**Chantilly - A-LIST!** Creeping. High turf quality and disease resistance, excellent wear tolerance, and weed resistant

**Cindy Lou** - Creeping. Aggressive rhizomes, fine leaf texture, density, quick spring green up, and winter color

**Class One** - Creeping. Strong wear tolerance, high turf quality, density, and disease resistance

**Eureka II** - Hard. High shoot density, dark green color, drought tolerance, and low maintenance

**Longfellow 3** - Chewings. Improved quality, excellent density, strong Red Thread and Dollar Spot resistance

**Quatro** - Sheep. Extremely fine blades, a distinct deep dark color, shade tolerance, establishes rapidly with very slow plant growth

**Wrigley II** - Chewings. High turf quality, Pink Patch and Red Thread resistance, salt tolerance, and dark green color

## ANNUAL RYEGRASS

**Establishment 4 to 7 Days**

*Use in winter overseeding of bermudagrass or when quick turf is desired under less than ideal environmental conditions*

**Axella 2** - Improved color, leaf texture, and density. Features a dwarf growth habit, excellent cold tolerance, rapid germination, and ease of transition

**Candidame** - Darker green color, higher tiller density, and fine leaf texture

**Quickston** - Moderate tiller density, fine leaf texture, and transition ability
