

TOCCOA

Turf-Type Tall Fescue

Toccoa

- Darkest green color
- Fine leaf texture
- Early spring green-up
- High Brown patch resistance
- Strong wear tolerance

QUICK FACTS: *Toccoa* turf-type tall fescue has a very green color, dwarf growth habit, high tiller density and excellent turf quality, making it an excellent choice for high traffic areas. It greens up early in the spring and has high spring density – an added benefit for cool weather sites. It is ideal for the Transition zone and the Southeast partially due to superior Brown Patch resistance. *Toccoa* has the stress tolerance of older tall fescue with superior turf performance.

ADAPTATION: *Toccoa* is recommended for permanent turf in full sun or partial shade on golf course roughs, out-of-bounds areas, lawns, sports fields and low maintenance sites. It can be utilized in poly species grass seed mixtures maintained at a low-to-high height of cut. Can be used in dry temperate regions in addition to hot and humid regions with excellent results.

SEEDING RATE: 7-8 lbs. p/1000 sq. ft.

Turfgrass Color & Quality

Fayetteville, AK – 2007-8

	Color	Quality
Toccoa	7.3	7.5
Bullseye	6.9	7.0
