

## FINE FESCUE EST. 18 TO 21 DAYS

Excellent as a component for shade and low maintenance areas

### STRONG CREEPING RED

**Chantilly** – High turf quality and disease resistance, excellent wear tolerance, and superior density.

**Class One** – Strong wear tolerance, high turf quality, density and disease resistance.

**Garnet** – Wear tolerant, high turf quality, tolerates all maintenance levels and sun or shade, drought tolerant, dark green.

**Maxima 1** – Superior choice over Common or Boreal Creeping Red Fescue.

**Rose City** – High endophyte with excellent Dollar Spot resistance, very dark green color, early spring green-up, high turf quality under many management levels.

### SLENDER CREEPING RED

**Shoreline** – Very high salinity tolerance, excellent cold tolerance, Pink Snow Mold resistance, dense, cool temperature growth.

### SHEEP

**Quatro** – Extremely fine blades, distinct deep dark color, shade tolerance, establishes rapidly with very slow plant growth.

### CHEWINGS

**Leeward - NEW!** High turf quality down to fairway heights. Excellent traffic tolerance. High resistance to Leaf and Dollar Spot, Red Thread, Brown Patch and Chinch Bugs

**Longfellow 3** – Improved quality, excellent density, strong Red Thread and Dollar Spot resistance.

**Windward** – Endophyte-enhanced, excellent turf quality from high to low maintenance. excellent resistance to Red Thread.

### HARD

**Eureka II** – High shoot density, dark green color drought tolerance, and low maintenance.

**Spartan II** – Highest stress tolerance, high quality, high or low maintenance, and summer stress tolerance.

# 4turf™

TETRAPLOID PERENNIAL RYEGRASS

## Stress resistance as a standard

Exceptional color, needs less water  
Drought, salt, disease resistance  
Outstanding winterhardness  
Stronger Establishment (Cold or Warm)

# SUPERIOR GENETICS

**Ph.D.**  
ELITE PERENNIAL RYEGRASS

**FUTURA**

PERENNIAL RYEGRASS BLEND

**THE HOUND DOGS**  
PREMIUM TALL FESCUE BLEND

**TEAM**

TALL FESCUE

# DLF PICKSEED

SEEDS & SCIENCE

## PRODUCT GUIDE

## ANNUAL RYEGRASS EST. 4 TO 7 DAYS

Use in overseeding of bermudagrass or when quick turf establishment is desired under less than ideal environmental conditions

**Candidame** – Darker green color, higher tiller density, and fine leaf texture.

**Quickdraw** – Finer leaf, darker green, true annual, faster establishment, increased vigor and cool temperature germination, transition without chemistry.

**Quickston** – Moderate tiller density, fine leaf texture, and transition ability.

## BENTGRASS EST. 14 TO 21 DAYS

Use on golf course greens, tees, and fairways

### CREEPING

**Macdonald SB** – Improved density, high summer performance, very high disease resistance, and cool weather active growth for extended play.

**MacKenzie SB** – Versatile-type for greens, tees and fairways, high density, establishes into existing stands, aggressive growth, and bright color.

**Cobra 2** – Improved density, summer performance, heat tolerance, winter color, and high dollar spot resistance.

**Futura Pro** – Blend with outstanding turf quality, heat tolerance, increased resistance to Brown Patch, Pink Snow Mold, and Dollar Spot.

# SB - SUPER BENTS

DLF is the global leader in development of turfgrass research and varieties. DLF is a market leader providing seed domestically and to more than 80 countries globally.

With one out of every three bags sold globally containing DLF bred varieties, there is a good chance that if you enjoy sports you may well have seen your favorite team or athlete perform on a playing surface seeded with DLF genetics. DLF turfgrass is the foundation on which superior sports performances are built, superior athletes play on surfaces that demand...

The A-LIST is a nonprofit organization that brings together seed producer members and universities cooperators to help identify and promote turf varieties that require fewer inputs. A-LIST approved varieties save water, require less fertilizer and chemicals all while maintaining their excellent turf quality.

## SUPERIOR GENETICS

## TALL FESCUE EST. 10 TO 14 DAYS

Use with or without bluegrass for sod, lawns and sports fields from Mid-south to North

**Crossfire 4** – Excellent Brown Patch resistance, superior wear tolerance, high shade tolerance, extremely low mowing tolerance, summer stress tolerance, very fine leaf texture, superior summer, fall and winter density, quick spring green-up.

**Firewall** – Excellent wear tolerance, high density and dark green color, low mowing tolerant, high brown patch resistance, Top NTEP in turf quality.

**Hounddog 8** – High crown density, fine texture, top turf quality, and disease resistance.

**Nightcrawler** – Highly rhizomatous, shade, drought, wear and heat tolerant, superior Brown Patch resistance.

**Rhizing Moon** – Highly rhizomatous, superior quality, drought tolerant, very dark green color.

**Fayette** – Superior turf quality across all NTEP locations, extreme wear tolerance, very dark green color, fine texture and heat tolerant.

**Bloodhound** – Aggressive tillering, Brown Patch resistance, shade tolerance, and density.

**Foxhound** – Dark green, dwarf, endophyte enhanced, excellent drought tolerance and recovery, wear and heat tolerant.

**Turfway** – Dark green year-round, excellent drought tolerance, and Brown Patch resistance, high number of rhizomes.

**Unitus** – Brown Patch resistant, drought tolerant, exceptional turf quality, dark green color.

**Essential** – High resistance to Brown Patch, improved density, leaf texture, and color.

**Garrison** – Aggressive tillering, resistance to Stem Rust, Net Blotch, and Brown Patch, very drought tolerant.

**Hounddog 6** – High crown density, dark green color, medium leaf texture, and drought tolerance.

**Mustang 4** – Excellent Brown Patch resistance, high density, dwarf, dark green color and fine texture, drought and wear tolerant.

**Rhizing Star** – Rhizomatous with excellent wear tolerance, establishment, and recoverability.

**Blade Runner II** – Spreader, quick rhizomes, high tillering and density, high summer performance and drought tolerant, high endophyte.

**Cayenne** – Lower growing, consistent performer, high summer density and recovery from drought stress.

## PERENNIAL RYEGRASS EST. 7 TO 10 DAY

Use alone or with bluegrass for year-round quality and sod strength

**Fiesta Cinco** – **NEW!** Top rated for turf quality in NTEP all locations. Excellent wear tolerance. Low winter kill and very dark green. High red thread and good Gray Leaf Spot.

**Allstar Fore** – **NEW!** Excellent turf quality, high resistance to Gray Leaf Spot, Red Thread, Crown Rust and Pink Snow Mold. Very dark green color. Superior wear tolerance at all heights of cut.

**Karma** – Highest Gray Leaf spot resistance, superior turf quality, high density, superior summer stress resistance, and spreading.

**Aspire** – Broad spectrum disease resistance especially Gray Leaf Spot and Helminthosporium.

**Diligent** – Very early spring green-up, high Gray Leaf Spot resistance, fine leaf texture, and Red Thread resistance.

**Thrive** – Freedom from leaf diseases, superior overall quality, excellent drought tolerance.

**Wicked** – Wear tolerant, top turf quality drought tolerant, high Gray Leaf Spot, Red Thread, Brown Patch and Pink Snow Mold resistance.

**Stamina** – Wear tolerant and excellent drought recovery.

**Bandalore** – High turf quality and resistance to Brown Patch, and Gray Leaf Spot, high wear tolerance.

**Banfield** – Gray Leaf Spot and Brown Patch tolerance improved turf quality, and color.

**Fiesta 4** – Consistent excellent turf quality, good Gray Leaf Spot resistance, spreading growth, and wear resistance.

**Hancock** – Dark green color, tiller density, and fine leaf texture.

**Gator 3** – Heat and disease resistance, dark green color, and fine leaf texture.

## 4turf™ TETRAPLOID RYEGRASS

**Replicator** – Winter hardy, cold and heat tolerant, mixes well with Tall Fescue, germinates under lower soil temperatures, and wear tolerant.

**Tetradark** – Quick establishment, very dark green color all year long, superior Red Thread and Dollar Spot resistance, excellent cold tolerance, cool temperature growth, drought and wear tolerant, high salt tolerance during germination and young plants.

## BLUEGRASS EST. 14 TO 21 DAYS

Use alone or with ryegrass, tall or fine fescue for year-round quality and sod strength

**Mercury** – America-type: Aggressive, traffic and mow tolerance, early spring green-up, fine leaf texture, and impervious to Rust.

**Sombrero** – Aggressive-type: High density, traffic and drought tolerance combined with Snow Mold resistance.

**Jackrabbit** – Julia-type: Fast germination and establishment, excellent tillering, high wear tolerance, excellent transition zone performance, Summer Patch resistance, dark green color, and early spring green-up.

**Fielder** – Shamrock-type: Rapid establishment, excellent traffic tolerance, early spring green-up, and superior summer performance.

**Armada (Pick 366)** – America-type: Excellent turf quality, drought and summer stress tolerance, early spring green-up, and good sod strength.

**Granite** – Midnight-type: Dark green, low mow tolerance, high density, fine leaves, great winter color, and Summer Patch resistance.

**Quantum Leap** – Midnight-type: High drought tolerance, high performance all maintenance levels, excellent sod strength, and low mow tolerance.

**Rhythm** – Midnight-type: Compact vigorous growth, summer performance, and low mow tolerance.

**Blue Velvet** – Midnight-type: Traffic tolerant, Summer Patch, Necrotic Ring Spot and Leaf Spot resistant, top turf quality, drought tolerant.

**Geisha** – Aggressive-type: Very large seed, aggressive rhizomes, good turf quality, texture, and density.

**Blue Ghost** – Secunda hybrid-type: Fast establishment, cool season growth, Stem Rust resistance, and drought tolerant.

## ROUGH BLUEGRASS EST. 7 TO 14 DAYS

Southern winter overseed choice for bermuda greens. Northern turf mixes, adds shade tolerance

**Darkhorse** – Dark color, shade and wet tolerance, and quick germination for establishment.

**Racehorse** – Darker color, great in deep shade and wet conditions, and quick establishment.

**Sabre 3** – Quick germination, dark green color, fine leaf texture, excellent for winter overseeding or deep shade.

## BERMUDAGRASS EST. 14 TO 21 DAYS

Use in lawns, sports fields, golf courses, and for sod in Transition Zone and Southern locations

**Yukon** – Most cold tolerant seeded bermudagrass, high density, excellent turf quality and shear strength.

**Futura Heat** – Blend of superior bermudagrass seed.

**Mirage 2** – Increased cold tolerance, spring Dead Spot resistance, and green-up.

## INTERMEDIATE RYEGRASS EST. 7 TO 10 DAYS

Improved transition for overseeding and excellent nurse grass for permanent turf

**Remedy** – **NEW!** Newest generation transitional ryegrass. High turf quality, improved leaf texture and easy transition without chemistry. Darker green than past generations.

**TransAm** – Turf-type Transitional ryegrass: High density dark green color and finer leaf texture, able to transition without chemistry.

**Transist 2600** – Newest Transitional ryegrass: Leaf texture comparable to perennial, dark color, higher density, and smooth transition.

## SPECIALTY

**Two Putt Poa reptans** – Perennial Poa annua or creeping bluegrass: Uniform dense turf, very low mow tolerant for greens, shade tolerant, use for repair of damaged Poa greens.

**Microclover** – Dwarf white clover for lawns: Reduced inputs, naturally green, drought resistant, and crowds out weeds, combine with grass for low maintenance lawns.
