

# Technical Data

## BENEFITS

- Excellent Shade Tolerance
- Superior Turf Quality
- High Salt and Drought Tolerance
- Early Spring Greenup

# ARMADA

## KENTUCKY BLUEGRASS

**Armada** Kentucky Bluegrass (PSG 366) combines the spring and fall growth, high density, and shade tolerance of Compact-America type bluegrasses with quick germination and excellent rhizome formation. It has demonstrated excellent performance under a broad range of conditions from home lawns to golf fairways. It is highly recommended for those areas where stem rust during establishment has become an issue. Armada is particularly well adapted to medium and lower maintenance situations. It is a very dense, low growing variety with a dark green color and medium-fine leaf texture.

## PLANTING & MAINTENANCE

SEEDING RATE .....2-4 LBS PER 1000FT<sup>2</sup>  
 GERMINATION .....5-11 DAYS  
 MOWING FREQUENCY.....1 TIME PER WEEK  
 NITROGEN REQUIRED.....LOW  
 ENDOPHYTE ENHANCED.....NO

## RATINGS

Poor-----Excellent
