

Technical Data

BENEFITS

- A-LIST Cultivar for Reduced Maintenance
- Resistance to Brown Patch and Gray Leaf Spot
- Aggressive Tillering and Rhizomes for Wear Tolerance
- High Turf Quality High/Low Maintenance

FAYETTE

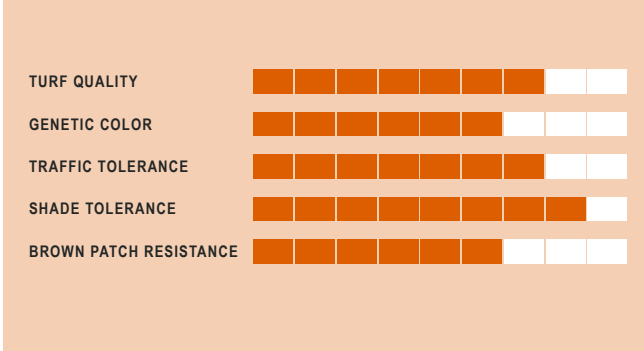

TALL FESCUE

Fayette turf-type tall fescue (IS-TF-153) is known for its resistance to Stem Rust and Net Blotch as well as being tolerant to summer drought. When other varieties go dormant from heat or drought stress, Garrison maintains its summer color and turf quality. In areas of high traffic requiring low maintenance, Garrison's aggressive tillering action creates a resilient turf, effectively maintaining a superior grass surface in less than optimum conditions. Garrison is first class choice for home lawns, parks and playing fields.

PLANTING & MAINTENANCE

SEEDING RATE8-10 LBS PER 1000FT²
 GERMINATION10-14 DAYS
 MOWING FREQUENCY.....1 TIME PER WEEK
 NITROGEN REQUIRED.....LOW
 ENDOPHYTE ENHANCED.....YES

RATINGS Poor-----Excellent
