## CREEPING BENTGRASS

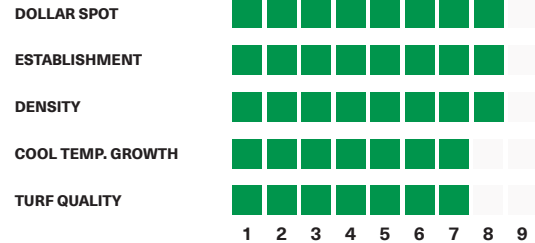

**Focus - Creeping Bentgrass (SRP-1GMC)** is an elite variety that has resistance to dollar spot and other diseases, enabling you to reduce your fungicide applications on greens, tees and fairways. Focus is a product of a DLF Pickseed and Rutgers cooperative breeding effort, and is the result of many years of development and improvement. Focus has shown quick recovery from aerification and verticutting as well as fast establishment.

Focus is a versatile variety and can be used for tees, greens, and fairways. It's aggressive and produces a dense cover, but does not get too "puffy" in growth. Bred for adaptability it can be blended with other elite bents. It has a medium dark green color, with a fine leaf texture and high density. Focus is very competitive against *Poa annua* due to its aggressiveness and cool temperature growth.

Focus is unsurpassed in Dollar Spot resistance. Focus is a multi use variety. It's heat tolerance and summer performance make it well adapted to the transition zone and the upper south. It is also a high performer in cold environments.

( Rating: 1- 9, 1: Poor; 9: Excellent )
