

TALL FESCUE

Foxhound

Foxhound- Turf-Type Tall Fescue (IS-TF 284M2)

is the best choice when you are hunting for the darkest green turf type tall fescue. Combined with semi-dwarf growth, fine texture, and high density, Foxhound provides superior turfgrass quality across a broad range of sites. Foxhound shows excellent drought tolerance and also high performance under high temperatures. Excellent Brown Patch resistance contributes to long term survival and superior performance in the Southeast and Transition Zones. Foxhound also is very wear tolerant and shows fast recovery from damage. High levels of viable endophyte contribute to insect resistance and improved biotic and abiotic stress tolerance., improved seedling establishment, and reduced weed invasion.

Foxhound is recommended for permanent turf in full sun to shade in lawns, parks, sports field, sod farms, and golf course roughs. It can be blended with Kentucky bluegrass and other improved turfgrass species and maintained from 1/2" to 4".

(Rating: 1- 9, 1: Poor; 9: Excellent)
