

TALL FESCUE

Garrison

Garrison - Turf-Type Tall Fescue (IS-TF-153)

is known for its resistance to stem rust and net blotch as well as being tolerant to summer drought. When other varieties go dormant from heat or drought stress, Garrison maintains its summer color and turf quality. In areas of high traffic requiring low maintenance, Garrison's aggressive tillering action creates a resilient turf, effectively maintaining a superior grass surface in less than optimum conditions. Garrison is first class choice for home lawns, parks and playing fields.

Garrison is also recommended for permanent turf in full sun or partial shade on golf course roughs, out-of-bounds areas, and low maintenance sites. It can be utilized in poly species grass seed mixtures maintained at a moderate height of cut. It can be used in dry temperate regions and hot and humid regions with excellent results.

(Rating: 1- 9, 1: Poor; 9: Excellent)
