

KENTUCKY BLUEGRASS

Geronimo

Geronimo - Kentucky Bluegrass BMVG Type

It is a medium dark green KBG with excellent seedling vigor, fast establishment, and excellent wear tolerance, due to its large seed. Its aggressive rhizomes and good tillering ability allows for rapid filling of bare areas. Geronimo also features excellent spring green-up and density. It has shown good resistance to leaf spot, yellow rust, and pink snow mold.

Geronimo is widely adapted throughout the cool humid regions of North America. Strong wear resistance and slow vertical growth make it suitable for parks, playgrounds, home lawns, and roadsides. It has shown high heat, and drought tolerance.

(Rating: 1- 9, 1: Poor; 9: Excellent)
