

TALL FESCUE

Houndog 6

Houndog 6 - Turf-Type Tall Fescue

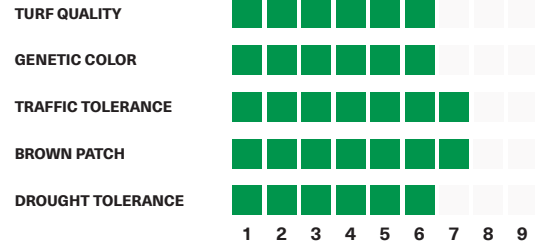

is a proven heat and disease resistant tall fescue variety developed for superior turf quality across a wide area of adaptation. It is a very dark green, moderately fine textured tall fescue with excellent wear tolerance. It is endophyte enhanced which provides resistance to leaf and crown feeding insects and nematodes. The endophyte contributes to improved biotic and abiotic stress tolerance. Houndog 6 also demonstrates improved seedling establishment, enhanced spring/fall recovery, and reduced summer/winter weed invasion.

Houndog 6 is a proven performer across the world. It is recommended for permanent turf in full sun or partial shade on golf course roughs, out-of-bounds areas, and low maintenance sites. It can be utilized in poly species grass seed mixtures maintained at a moderate height of cut.
