

Technical Data

BENEFITS

- A-List Cultivar
- Resistance to Broad Range of Diseases
- Superior Wear Tolerance
- Long Season of Growth

JACKRABBIT

KENTUCKY BLUEGRASS

Jackrabbit Kentucky Bluegrass (*Poa pratensis*) (PST-K10-106D) is a Julia-type that jumps out of the ground and starts spreading - ideal for sod growers, sports fields and home lawns. It also has excellent turf quality under all maintenance regimes (excels under low maintenance and in high stress environments). Jackrabbit is an A-List cultivar that shows low maintenance performance, and is one of the few Julia types on the market, known for superior wear tolerance. Jackrabbit has a dark green color, which it retains into the winter and early spring green-up. This cool season growth helps reduce *Poa annua* invasion. It demonstrates high resistance to a broad range of diseases including Summer Patch, Dollar Spot, Leaf Spot, Crown Rust and Stem Rust.

PLANTING & MAINTENANCE	
SEEDING RATE	2-4 LBS PER 1000FT ²
GERMINATION	6-12 DAYS
MOWING FREQUENCY.....	1 TIME PER WEEK
NITROGEN REQUIRED.....	LOW
ENDOPHYTE ENHANCED.....	NO

RATINGS	Poor-----Excellent
TURF QUALITY	██████████
SPRING GREENUP	██████████
GENETIC COLOR	██████████
SEEDLING VIGOR	██████████
WEAR TOLERANCE	██████████
