

Mirage 2 - Bermudagrass (CIS-CD6)

was developed for increased cold tolerance and its ability to withstand winterkill. Mirage 2 was among the most persistent varieties in cold locations. With an attractive green color and resistance to diseases including Dollar Spot and Spring Dead Spot, Mirage 2 will persist and thrive where other bermudagrass varieties fail. Excellent for colder sites it has high turf quality for all bermudagrass uses.

Mirage 2 was developed for all bermudagrass uses. It can be successfully utilized in full sun on golf course fairways and roughs, and is an excellent choice for sports/ athletic fields, parks and playgrounds.
