

Technical Data

BENEFITS

- Rapid Germination all year
- Quick cover
- Improved Turf quality
- Easy transition

QUICKDRAW

ANNUAL RYEGRASS

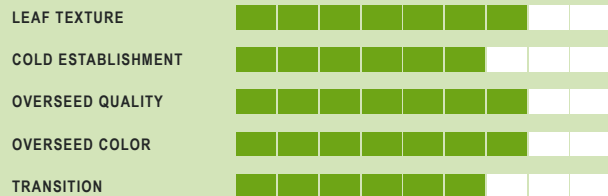

Quickdraw Annual Ryegrass (PS AR09) is a quick germinating variety, perfect for winter overseeding or any use where high quality, rapid turf cover is required. Quickdraw features finer leaf texture, darker green color, and improved turf quality over older varieties of turf-type annual ryegrasses. Quickdraw is ideal for use as an overseeding grass in the south and as a nursegrass in the north. While designed for use in overseeding golf courses and for sports fields, it is also well adapted for landscaping. Quickdraw germinates and actively grows at lower soil temperatures than perennial ryegrass. It transitions more quickly and uniformly than perennial ryegrass without chemicals, saving additional expenses. It is cost effective for use as a straight variety or in a blend.

PLANTING & MAINTENANCE

SEEDING RATE6-13 LBS PER 1000FT²
 GERMINATION4-7 DAYS
 MOWING FREQUENCY.....1 TIME PER WEEK
 NITROGEN REQUIRED.....MED
 ENDOPHYTE ENHANCED.....NO
