

Technical Data

BENEFITS

- Dark Green Color
- Heat Tolerant
- Disease Resistant
- Wear Tolerant

RHYTHM

KENTUCKY BLEUGRASS

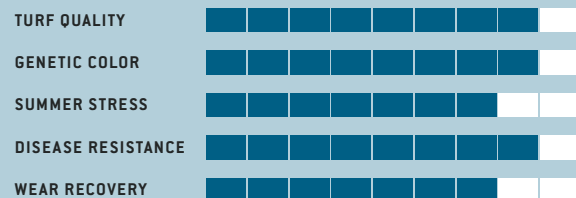

Rhythm is an outstanding Midnight-type Kentucky Bluegrass with improvements in density and color over other Midnight-types as demonstrated in trials at Rutgers University. Performing extremely well under conditions of summer stress, plus resistance to common diseases makes Rhythm a diversified player in areas where bluegrass is a favored species. Improved wear recovery helps with sports fields or golf courses.

PLANTING & MAINTENANCE

SEEDING RATE2-4 LBS PER 1000FT²
 GERMINATION6-12 DAYS
 MOWING FREQUENCY1 TIME(S) PER WEEK
 NITROGEN REQUIREDLOW
 ENDOPHYTE ENHANCEDNO
