

Technical Data

BENEFITS

- Excellent Wear Tolerance
- High Drought Resistance
- Dark Green Color
- Superior Turf Quality

STAMINA

PERENNIAL RYEGRASS

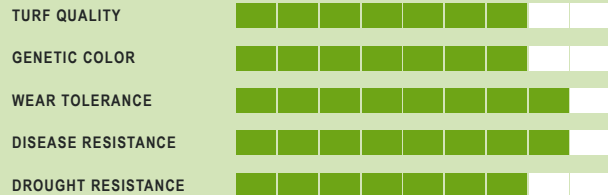

Stamina is a very wear tolerant perennial ryegrass with excellent recovery from drought. Highly resistant to brown patch, Stamina will live up to its name as a quality turf in response to disease pressure and environmental stresses. Stamina is naturally endophyte enhanced, inherently repelling surface feeding insects and subsequent vulnerability to disease and stress. Stamina is excellent for areas of high traffic where tolerance to wear and quick recovery are critical. Perfect for parks, sports/athletic fields and other high use venues as a straight or in blends and mixtures. Stamina is highly valued for overseeding dormant bermudagrass in the south and arid regions, extending turf usage.

PLANTING & MAINTENANCE

SEEDING RATE7-10 LBS PER 1000FT²
 GERMINATION6-9 DAYS
 MOWING FREQUENCY.....1-5 TIMES PER WEEK
 NITROGEN REQUIRED.....MED
 ENDOPHYTE ENHANCED.....YES

RATINGS

Poor-----Excellent
