

TALL FESCUE

Unitus

Unitus - Turf-Type Tall Fescue (IS-TF 289)

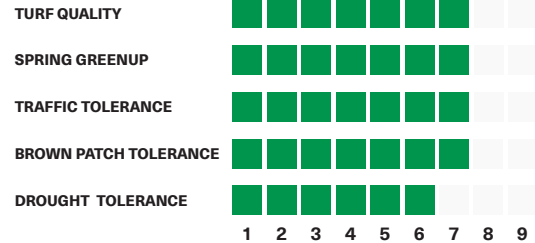

combines dark green color with drought tolerance for superior quality with long term performance. From the Southeast to the North, Unitus shows excellent turf quality under high or low maintenance. Unitus has excellent Brown Patch resistance which contributes to its persistence. High levels of viable endophyte contribute to insect resistance, improved biotic and abiotic stress tolerance, improved seedling establishment, and reduced weed invasion.

Unitus is recommended for permanent turf in full sun to shade in lawns, parks, sports field, sod farms, and golf course roughs.
